Proven ability to design, develop, and optimize high-performance and scalable backend systems. Current position as Senior Software Engineer (Backend) at Sekolah.mu to contribute to the development of innovative and impactful platforms.

---

## EXPERIENCE

### Senior Software Engineer (Backend)

sekolah.mu

January 2024 - Present, Jakarta, Indonesia · Remote

Sekolah.mu is the school with a blended learning system in Indonesia.

- Develop all change requests from client requirement.
- Research and implement new technology if needed.
- Tracing the root cause if there's a problems in production and find long term solution.
- Optimize and enhance current apps if needed.
- Create scalable apps, easy maintain and clean.
- Helping design new system if needed.
- Technology: Laravel · Amazon SQS · Web Services API · API Development · Elasticsearch · REST APIs · Go (Programming Language) · GORM · Gin · PHP · MySQL · Git

### Backend Engineer

sekolah.mu

January 2023 - December 2023, Jakarta, Indonesia · Remote

Sekolah.mu is the school with a blended learning system in Indonesia.

- Develop all change requests from client requirement.
- Research and implement new technology if needed.
- Tracing the root cause if there's a bugs in production and find long term solution.
- Create integration test if build new feature with Golang.
- Optimize and enhance current apps if needed.
- Technology: Laravel · Amazon SQS · Web Services API · API Development · Elasticsearch · REST APIs · Go (Programming Language) · GORM · Gin · PHP · MySQL · Git

### Full Stack Engineer

sekolah.mu

April 2022 - January 2023, Jakarta, Indonesia · Remote

Sekolah.mu is the school with a blended learning system in Indonesia.

- Develop all change requests from client requirements.
- Research and implement new technology if needed.
- Tracing the root cause if there's a bugs in production and find long term solution.
- Create integration test if build new feature with Golang.
- Optimize and enhance current apps if needed.
- Technology: Laravel · Amazon SQS · Web Services API · API Development · Elasticsearch · REST APIs · Go (Programming Language) · Vue.js · GORM · Gin · PHP · MySQL · Git

### Full Stack Developer

Collega Inti Pratama, PT

May 2018 - May 2022, Jakarta Selatan, Jakarta, Indonesia · Hybrid

Collega Inti Pratama, PT is a national IT company that contributes to developing Information Technology for Banking and Finance.

- Develop all change requests from client requirement.
- Research and implement new technology if needed.
- Tracing the root cause if there's a bugs in production and find long term solution.
- Build new feature for Open Banking with open API.
- Technology: REST APIs · Java · Spring Boot · Spring Framework · Spring MVC · RESTful WebServices · Hibernate · Spring Batch · DB2 · Zkoss · Git

### Java Programmer

Padepokan Tujuh Sembilan, PT

March 2017 - February 2018, Bandung Area, West Java, Indonesia · On-site

Padepokan Tujuh Sembilan is a software company that provides IT, project management, and documentation services.

- Porting core banking apps from Power Builder to Java.
  - Enhance core banking apps from Java 6 to Java 8.
  - Develop client request.
  - Technology used: Java, DB2, Hibernate, Zkoss.
-

## PROJECT

---

### Generate Invoice SaaS

Invoice Plus (Freelance) • September 2023 - June 2024

- Build a backend services using Golang using framework Echo and Gorm.
- Swagger for API documentation using swaggo library.
- Create a solid database structure with PostgreSQL.
- Tech Stack: Golang, Echo, Gorm, PostgreSQL, Swagger, and JWT.

### Create Open Banking

Freelance • July 2022 - February 2023

- Help designed new system for Open Banking.
- Develop open API using concept of microservices.
- Create API documentation
- Tech Stack: Golang, Redis, RabbitMQ, Docker, CI/CD, and Swagger.

### Research and Implement Elasticsearch

sekolah.mu • October 2022 - December 2022

- I research and implement how to optimize feature like advanced filter in the project I handled. The advanced filter need more time to get the data because there is complex query join and the condition in filtering the result, so I move the data into Elasticsearch. And after that filtering process is not become a blocker because data reader from MySQL moved to Elastic.

### Research and Implement Amazon SQS

sekolah.mu • August 2022 - September 2022

- Research and implement Amazon SQS for enhance excel generating of list candidates, this process using worker / scheduler before in Laravel. But if there lots of candidates the servers can become out of memory or make another task in the scheduler need more time because must wait this process done first. But after I implemented Amazon SQS the process can be done with more efficient in time and memory and most important the process will not block another scheduler for run.

### Create Open API Core Banking

Collega Inti Pratama, PT • September 2021 - May 2022

- Create open API of core banking using Java as backend, ORM using Hibernate, databases using DB2, Spring Boots and Rest API for the API and swagger for API documentation.

### Project Maintenance Core Banking System

Collega Inti Pratama, PT • May 2018 - May 2022

- Responsible for develop any change request from client.
- Find root cause if there's an anomaly in production and find the long term solution.
- Research for new feature or technology if client needed or for better business.
- Tech stack: Java, Zkoss, JPA, Hibernate, Springboot, Swagger, and DB2.

### Project Maintenance Core Banking System

Padepokan Tujuh Sembilan, PT • September 2017 - February 2018

- Responsible for develop any change request from client.
- Find root cause if there's an anomaly in production and find the long term solution.
- Research for new feature or technology if client needed or for better business.
- Tech stack: Java, ZKoss and DB2.

### BE Enhancement Core Banking System

Padepokan Tujuh Sembilan, PT • November 2017 - December 2017

- Rewrite and enhance code from Java 6 to Java 8. Technology I used here is Java for backend, frontend using Zkoss, databases using DB2, ORM using Hibernate and project structure used MVC in this project.

### External Module Enhancement Core Banking System v7

Padepokan Tujuh Sembilan, PT • September 2017 - November 2017

- Rewrite and enhance code from Java 6 to Java 8. Technology I used here is Java for backend, frontend using Zkoss, databases using DB2, ORM using Hibernate and project structure used MVC in this project.

### Porting Batch Process Core Banking Conventional from Power Builder to Java

Padepokan Tujuh Sembilan, PT • July 2017 - August 2017

- Rewrite and enhance code from Power Builder to Java 8. Technology I used here is Java with Spring Batch, frontend using Zkoss, databases using DB2, ORM using Hibernate and project structure using MVC in this project.

### Porting Batch Process Core Banking Syariah from Power Builder to Java

Padepokan Tujuh Sembilan, PT • April 2017 - June 2017

- Rewrite and enhance code from Power Builder to Java 8. Technology I used here is Java with Spring Batch, frontend using Zkoss, databases using DB2, ORM using Hibernate and project structure using MVC in this project.

---

## EDUCATION

### Bachelor's degree, Information Technology

Institut Teknologi Garut • Garut, West Java • 2016 • 3.4

---

## CERTIFICATIONS

### Oracle Certified Professional, Java SE 8 Programmer

Oracle • 2021

### Oracle Certified Associate, Java SE 8 Programmer

Oracle • 2020

---

## SKILLS

Languages: Indonesia, English

Tools & Technologies: Java, Spring Boot, Spring Batch, Golang, Laravel, Hibernate, Spring Framework, Spring MVC, RESTful WebServices, Amazon SQS, RabbitMQ, Web Services API, API Development, GORM, GIN, Echo, Elasticsearch, REST APIs, Vue.js, PHP, HTML, Swagger, SQL, MySQL, IBM DB2, and PostgreSQL.
